

# **HOW TO AVOID INCIDENTAL TAKE OF LYNX**

*While Trapping or Hunting  
Bobcats and other Furbearers*

The purpose of this publication is to help achieve the goal of reducing injury and mortality to the Threatened Canada lynx population in the contiguous United States, which may occur as a result of hunting or trapping bobcats and other furbearers. This pamphlet was produced as a joint effort between the United States Fish & Wildlife Service and the International Association of Fish and Wildlife Agencies.

The mission of the U.S. Fish & Wildlife Service is working with others to conserve, protect and enhance fish, wildlife, and plants and their habitats for the continuing benefit of the American people.

The International Association of Fish and Wildlife Agencies governmental members include the fish and wildlife agencies of the states, provinces, and federal governments of the U.S. and Canada. All 50 states are members. The Association has been a key organization in promoting sound resource management and strengthening federal, state, and private cooperation in protecting and managing fish and wildlife and their habitats in the public interest.

# ACKNOWLEDGEMENTS

Primary authors Howard Golden, Alaska Department of Fish and Game, and Tom Krause, National Trappers Association, wish to recognize the significant efforts of Gordon R. Batcheller, New York State Division of Fish, Wildlife & Marine Resources and Lori Nordstrom, USFWS Montana Field Office. Additionally, the input received from the following reviewers was greatly appreciated:

Jerry Apker

Ted N. Bailey

Ed Bangs

Ed Boggess
